

VKDA 35418 / 35418 T

Technical Bulletin – December 2012

Ford

Fitting recommendations

Car Maker	Main model	Engine
Ford	Mondeo III	All

For detailed application, please refer to TecDoc or the latest SKF catalogue.

To ensure a good fitting, the unit which was packed in the suspension kit VKDA 35418 and 35418 T must be fitted with the arrow marking facing to the outside of the vehicle.

Always lower the vehicle back to the ground, and gently 'rock' the vehicle to settle the suspension, before applying the torque to the above component.

VKDA 35418 / VKDA 35418 T

It must be fitted with the arrow marking facing to the outside of the vehicle.

Torque specifications for this mount

- Shock absorber piston rod = 58Nm
- 3 X retaining nuts = 30Nm

If this manufacturer's fitting instruction is not followed, damage will occur to the bearing assembly as shown below.
