

BDS-2

Marker Light Set

The LED clearance light BDS-2 with optical reversing sensor offers crucial safety and cost benefits. In addition, the BDS-2 can be used in various areas of application (truck & trailer, agriculture, etc.). On reversing, the sensor detects obstacles as far as away as 4.5 m from the tractor vehicle, thus allowing the driver to

park the vehicle safely. Three different flash frequencies provide a reliable indication of the decreasing distance from the obstacle.

- 4.5-m range
- 3 different flash frequencies
- simple installation

WxH: 155 x 190 mm
Number of LEDs: 8

Info: with sensor
